GLEC V2 CO2e CALCULATION TRACE

Logistics Framework: GLEC Global Logistics Emissions Council Standard
Activity Value: 20 Tonnes * 1500 km = 30000 tkm
GLEC Emission Coefficient: 0.0920 kg CO2e / tkm
Category Mapping Code: UPSTREAM_TRANSPORT

Notice: Scope 3 Category 4 calculations under GLEC framework utilize the weight-distance strategy. The weight in kilograms is divided by 1000 to convert to metric tonnes, multiplied by transited distance in kilometers, and multiplied by the GLEC road-freight factor.
